

## Amendment to the Claims

Below is a complete listing of the claims.

1. (Currently amended) A system for teaching interviewing comprising:

- a. a processor; and
- b. a memory; wherein the processor and memory cooperate to perform a method

comprising:

~~means for~~ obtaining decisions by a student whether provided descriptions of experience are true for an experience of the student;

~~cross-referencing means for~~ cross-referencing from the descriptions of experience to personality traits;

~~recording means for recording a writing entries~~ by the student in a worksheet in the memory, the ~~recording means~~ worksheet comprising a first region for a list of personality traits obtained via ~~the cross-referencing means~~, and a second region in association with the first region, the second region for a summary of the experience;

providing a first ~~means for teaching instruction~~ that directs the student to make decisions in cooperation with the means for obtaining decisions;

providing a second ~~means for teaching instruction~~ that directs the student to make entries in the regions of the ~~recording means~~ worksheet in accordance with the decisions; and

providing a third ~~means for teaching instruction~~ that directs the student to retell the summary of the experience in answer to a question during an interview.

2. (Currently amended) The system of claim 1 wherein the ~~recording means~~ worksheet further comprises a third region in association with at least one of the first region and the second region, the third region for a summary list comprising the personality traits obtained via ~~the cross-referencing means~~.

3. (Previously presented) The system of claim 2 wherein the summary list further comprises at least one of values and morals that the student has determined are demonstrated by the experience.

4. (Currently amended) The system of claim 2 wherein the method further comprising a fourth means for teaching that directs comprises directing the student to retell at least part of the summary list in answer to the question during the interview.

5. (Currently amended) The system of claim 1 wherein the method further comprising entering means for comprises automatically entering personality traits into the first region in accordance with ~~the means for~~ obtaining decisions and in accordance with ~~the~~ cross-referencing means.

6. (Cancelled)

7. (Currently amended) The system of claim 1 further comprising transmitting means for transmitting across a network link indicia of at least one of the first ~~means for teaching, the second means for teaching, and the third means for teaching~~ instruction, the second instruction, and the third instruction.

8. through 32. (Cancelled)

33. (New) A method performed by a computer system for teaching interviewing, the method comprising:

outputting an instruction for a student to prepare a respective description of each of a plurality of experiences using a respective subset of a set of themes, the subset being associated with the respective experience;

storing each respective description in a memory of the computer system;

maintaining in the memory an association between each respective description and the respective subset;

outputting an instruction for the student to use any particular member of the subset to recall a particular description; and

outputting an instruction for the student to respond to a prompt during an interview by retelling the recalled description.

34. (New) The method of claim 33 wherein each member of the set of themes comprises at least one of a moral, a personality trait, and a value.

35. (New) A memory comprising instructions for a computer to perform the method of claim 33.

36. (New) The method of claim 33 further comprising:

outputting an invitation for the student to identify experiences;

receiving and storing indicia of identified experiences;  
outputting an instruction for the student to associate provided brief descriptions with identified experiences;

receiving and storing indicia of each association; and  
for at least one identified experience, outputting the respective subset, wherein each member of the subset corresponds to at least one of the associated brief descriptions.

37. (New) A memory comprising instructions for a computer to perform the method of claim 36.

38. (New) The method of claim 33 further comprising:  
outputting an instruction that asserts that prompts are in recognizable categories;  
outputting an instruction for the student to associate themes with prompts; and  
outputting an instruction for the student to respond to a particular prompt by:  
recognizing the category of the particular prompt; and  
recalling the associated theme of the particular prompt.

39. (New) A memory comprising instructions for a computer to perform the method of claim 38.

40. (New) The method of claim 33 further comprising:  
outputting an instruction for the student to, after retelling, state at least one theme that had been associated with the experience.

41. (New) A memory comprising instructions for a computer to perform the method of claim 40.

42. (New) A system for teaching interviewing comprising:  
electronic media comprising at least one worksheet for use by a student to obtain the student's decisions whether provided descriptions of experience are true for an experience of the student, to cross-reference from the description of experience to personality traits, and to record in a first region of the worksheet a set of the personality traits obtained via cross-referencing in accordance with the decisions, and in a second region of the worksheet associated with the first region a summary of the experience; and  
a computer that outputs an instruction for the student to use the media with respect to a plurality of experiences of the student, that maintains storage for the electronic media for a plurality of worksheets each worksheet according to a respective experience of the

plurality, that outputs an instruction for the student to use a member of a particular set of personality traits to recall the associated particular summary and to retell the recalled summary in answer to a question during an interview.

**43.** (New) The system of claim 42 wherein the purposes of the media further comprise to record a summary list comprising the personality traits obtained via cross-referencing.

**44.** (New) The system of claim 43 wherein the summary list further comprises at least one of values and morals that the student has determined are demonstrated by the experience.

**45.** (New) The system of claim 43 wherein the purposes of the instructions further comprise to direct the student to retell at least part of the summary list in answer to the question during the interview.

**46.** (New) The system of claim 42 further comprising a transmitter that transmits across a network link indicia of the at least one worksheet for use by the student.

**47.** (New) The system of claim 42 wherein the instructions are provided in a video presentation.
